1- Journal de stage (à rédiger par le stagiaire)

Date	Tâches réalisées
01-07-2025	Introduction to the Company and Project Goals: I was introduced to the Quality department, the Power Platform team, and the overall cleaning audit project. I learned about the company structure and the objectives behind digitizing the audit process.
02-07-2025	Observation of Cleaning Processes: I observed on-site cleaning and auditing activities and analyzed the Excel sheets used to track tasks. This helped me understand the workflow, identify paper-based limitations, and determine the essential data to digitize in Power Apps.
03-07-2025	Study of Audit Forms and Required Data: I reviewed all existing audit forms to identify the data fields and sections that needed digitization. I categorized the information to prepare the data structure.
04-07-2025	Analysis of the Existing Audit Workflow: I reviewed the cleaning audit process with my supervisor, which allowed me to map the workflow, identify paper-based limitations, and outline the key interfaces and functionalities needed for the Power Apps solution .
07-07-2025	Creation of the Project Requirements Document (Cahier des Charges): I created a comprehensive requirements document detailing all planned tasks, project objectives,

	selected tools, design choices, and color schemes. This document serves as a roadmap for project execution and ensures alignment with stakeholder expectations.
08-07-2025	Design of the Data Structure: I defined the SharePoint lists and fields required for storing supplier, facility, contract, and responsible information. This formed the basis of the application's database
09-07-2025	Logical Data Model Creation: I designed the logical model linking suppliers, facilities, and contracts. I prepared diagrams to represent data flow and relationships.
10-07-2025	Validation of the Data Model: I reviewed the data model with the supervisor and adjusted list structures to better match operational needs.
11-07-2025	Sketching User Interfaces: I created wireframes for the application's main screens, defining the layout and navigation concept for each module.
14-07-2025	SharePoint Environment Preparation: I set up SharePoint lists and configured access permissions. I also tested the connection between Power Apps and SharePoint.
15-07-2025	Creation of SharePoint Lists: I created the necessary lists (Suppliers, Facilities, Contracts, Responsibles) and configured relationships and column types.
16-07-2025	Development of the Home Screen: I designed the main interface and built the navigation structure, including buttons and links to all modules.
17-07-2025	Development of the Facility Responsible Module:

	I implemented screens for creating, editing, and viewing responsible personnel linked to facilities.
18-07-2025	Testing Navigation and Data Access: I tested navigation between modules and validated that data from SharePoint loaded correctly in each.
21-07-2025	Fixing Data Synchronization Issues: I identified and solved synchronization issues between Power Apps and SharePoint to ensure stable data updates.
22-07-2025	Development of Supplier Module (CRUD): I built the Supplier module with full Create, Read, Update, and Delete functions.
23-07-2025	Implementation of the Plant (Facility) Screen: I developed the screen used to manage facilities and linked it to suppliers and responsables.

Date	Tâches réalisées
24-07-2025	Contract Module & Data Accessibility Enhancements: I developed the Contract module and linked it to suppliers and facilities, while also adding search and filtering features to improve data accessibility across all modules.
28-07-2025	Data Consistency Testing: I tested relationships between modules to ensure that updates in one list reflected correctly across the app.
29-07-2025	Integration of Power Automate Workflows: I created automated workflows for notifications related to audits and validations.
30-07-2025	User Role and Permission Management: I implemented user roles (admin, manager, viewer) and linked each role to specific permissions.

31-07-2025	UI/UX Improvements: I improved layouts, simplified forms, and enhanced visual clarity for better user experience.
01-08-2025	Performance Optimization: I optimized data loading by reducing unnecessary queries and improving screen responsiveness.
04-08-2025	Integration with Microsoft Teams: I connected the application with Microsoft Teams to facilitate collaborative testing.
05-08-2025	User Testing with the Quality Department: I performed complete system testing with end users and collected feedback on usability.
06-08-2025	Fixing Issues and Final Validation: I applied corrections based on feedback and performed the final functional validation.
07-08-2025	Preparation of Final Report and Presentation: I prepared the internship report and created a PowerPoint summarizing the project and its results.
08-08-2025	Presentation of the Application: I presented the application to supervisor, demonstrating all key features.
11-08-2025	Discussion of Feedback and Future Enhancements: I discussed possible future improvements, including Power BI dashboards and mobile integration.
12-08-2025	Final Bug Fixes and Refinements I reviewed the application for minor bugs and made adjustments to improve performance and reliability across all modules.
13-08-2025	User Manual Drafting: I started writing a detailed user manual with step-by-step instructions for each module and common troubleshooting tips.

14-08-2025	Training Session Preparation: I prepared materials and slides for training company staff to use the new application efficiently.
15-08-2025	Staff Training Session: I conducted a training session with end-users, explaining functionalities .
18-08-2025	Implementation of Feedback Adjustments: I applied suggested improvements based on feedback, including minor UI changes and workflow optimizations.
19-08-2025	Internship Reflection and Handover: I prepared a final handover document, reflected on skills gained, and summarized contributions to the project.

2- Evaluation du stage (à remplir par le maître du stage)

Excellent : les missions que le stagiaire effectue, dépassent non seulement les normes requises, mais méritent une mention particulière Très bon : les missions que le stagiaire effectue, dépassent les normes requises. Satisfaisant : les missions effectuées par le stagiaire correspondent aux normes demandées Insatisfaisant : les missions effectuées par le stagiaire ne correspondent pas aux normes demandées	Excellent	Très bon	Satisfaisant	Insatisfaisant
Motivation personnelle de l'étudiant				
Esprit d'initiative				
Capacité d'assumer les responsabilités qui lui sont confiées				
Capacité d'adaptation aux divers changements				
Capacité de travailler en groupe				
Capacité de communiquer par écrit				
Capacité de s'exprimer en public				
Tient compte des remarques				
Est capable de travailler seul				
Réalise un travail avec soin et précision				

☐ Stage concluant	☐ Stage non concluant
Signature du maître de stage	Cachet de l'entreprise

Recommandations pour le stagiaire

DURANT LE STAGE

L'élève ingénieur devra :

1. mettre à la disposition de son encadrant entreprise, dès le 1er jour du stage, le présent journal pour y définir le programme du stage,
2. respecter les conditions de l'employeur : (horaire de travail, ponctualité, discrétion, discipline, etc.),
3. accomplir les tâches définies dans le programme de stage.

APRES LE STAGE

A la rentrée universitaire, l'élève ingénieur remettra une version numérique au service des stages de l'école :

- 1- de l'attestation de fin de stage (l'originale restera à la disposition de l'étudiant)
- 2- du rapport de stage.
- 3- du présent journal dûment rempli et visé par l'Encadreur et l'organisme d'accueil (obligatoirement rempli manuellement puis scanné).

Remarque importante :

Le lien de dépôt sera communiqué aux étudiants par le département des stages au début de l'AU 24/25.
